I believe that my perspectives on minority issues, specifically with regards to the Jewish and LGBT+ communities, are valuable in monitoring and assessing questions of human rights as they affect Juneau. I believe that my personal history allows me to see things from multiple perspectives, having lived in communities of immigrants and in an area of the world that tends to be a magnet for controversy. While I'm still relatively new to Juneau, I also think it's valuable to have that perspective, considering how many of our residents are seasonal or temporary. And I want to help. I want to be an active member of my community, and I want to build my community to be a better place, a fairer place, for all of its residents. And I believe that the HRC is a good venue for me to pursue this goal.

JUNEAU COMMISSION ON SUSTAINABILITY ANNUAL REPORT JUNE 2020 - MAY 2021

I. HIGHLIGHTS – Actions Undertaken by JCOS

The Commission held regular meetings and work sessions monthly via Zoom beginning in mid-June 2020. Much of the commission's work is researched and drafted by its committees. Working backwards from recent work, JCOS accomplishments include:

- In the past year and ongoing, JCOS has **collaborated with the Assembly's Public Works & Facilities Committee (PWFC) and the CBJ Engineering & Public Works Department (EPWD)** as they have actively pursued sustainability issues – EV charging infrastructure, CBJ internal energy management & facilities upgrades, Juneau energy data update, solid waste issues, and CIP process. JCOS thanks PWFC and EPWD for making progress on these thorny issues in the past year!
- Beginning in May 2021, collaborated with CBJ Docks & Harbors on a **federal USDOT (RAISE) grant application** for \$20M-plus funding for electrical infrastructure and shore power equipment to electrify CBJ's two 16B docks. JCOS brings information on climate action, sustainability, and public/industry benefits to the grant process, and is gathering community and regional letters of support.
- Revitalized its public outreach efforts and initiated a **new lunchtime Sustainability Session @ 12-1PM**, on the 4th Thursdays of March (*Air Quality Monitoring in Juneau*), April (*Refresher on Juneau's Renewable Energy Strategy*) and May (*Juneau's Solid Waste 101*).
- In March 2021, provided the Assembly JCOS's report: ***Juneau Solid Waste Fact Sheet and Recommendations for a Course of Actions by the CBJ Assembly***, which compiles background information and potential actions that can be undertaken to control the waste stream into the landfill and to develop a future alternative to replace the current landfill when it reaches its capacity.
- For the fourth year, assisted CBJ Capital Transit in its 2021 federal **FTA grant application for additional electric buses and charging infrastructure** by gathering several public support letters from a range of Juneau organizations and ADEC.
- In an ongoing basis, participated in several meetings of **Alaska municipalities** (elected officials, staff, and activists) as they collaborate and share information on climate

actions, programs, and policies. The Alaska Climate Action Community of Practice is facilitated by UAA and the Alaska Center.

- In February 2021, responded to correspondence from Alaska Electric Light & Power (AEL&P) regarding a JCOS graphic on 2007-2019 electric sales data for Hecla Greens Creek Mine.
- In December 2020, proposed that the Assembly and City Manager use **Marine Passenger Fees for a Clean Port Initiative** addressing: dock electrification, electric buses and reduced congestion downtown, and reusable water bottles/water fill-up stations and reusable Juneau souvenir shopping bags to reduce tourist plastic waste.
- In December 2020, proposed to the Assembly an **energy pathways contract** to:
 - 1) update Juneau’s 2010 energy use and GHG emissions inventory using now-standard global protocol;
 - 2) prepare a business-as-usual GHG emissions forecast to 2050, against which the community can gauge its progress; and
 - 3) create a dynamic modeling tool that enable Juneau to analyze priority JRES strategies to determine their effectiveness at achieving the community 80% renewable energy by 2045 goal.
- In November 2020, provided recommendations to the Assembly for its annual retreat **sustainability goals-setting**:
 - 1) track CBJ’s energy use and costs;
 - 2) continue support for electrification of transportation and space heating;
 - 3) update Juneau’s 2010 energy use/GHG inventory and prepare an “energy pathways” analysis that quantifies specific actions that can be undertaken to achieve less reliance on fossil fuels by the community; and
 - 4) develop a solid waste strategy with priorities addressing waste reduction, waste diversion, and the eventual need for an alternative waste disposal site.
- As a multi-year effort, provided input to CBJ staff in November 2020 on **incorporating CBJ sustainability goals into the operational budget and CIP process**, including adding sustainability to the CIP criteria. JCOS supported existing CIPs – EV planning, electric bus charging infrastructure, utility pump station upgrades, and deferred maintenance of CBJ facilities, and recommended additional CIP projects that implement the above-mentioned sustainability goals.
- Drafted two **Mayor’s proclamations** for Energy Efficiency Day (October 7, 2020) and National Drive Electric Week -September 26, 2020). The proclamations, typically read at Assembly meetings, enhance public awareness about clean energy initiatives.
- Last fall, proposed a community **Award for Excellence in Sustainability**. The HRC approved the proposal, which is pending for consideration by the full Assembly.

III. OVERVIEW OF JCOS

The Juneau Commission on Sustainability, established by the Assembly in 2007, researches and advises the CBJ on community sustainability. The Commission's mission is to promote the economic, social, environmental, and governmental well-being of Juneau and all its inhabitants, now and in the future.

The Commission's powers and duties are to:

- *Coordinate, propose, and promote sustainability initiatives among residents, businesses, government, and non-governmental agencies and education organizations through education and outreach programs;*
- *Make recommendations to the Juneau Assembly and CBJ Boards and Commissions on policies and programs that promote sustainability;*
- *Research and apply for grants or other funds or CIPs from public or private agencies for the purpose of carrying out any of the provisions or purposes of the resolution establishing the commission;*
- *Serve as an advisory group to the CBJ in reducing greenhouse gas emissions to target levels as adopted by the CBJ Assembly and;*
- *Act as liaison between the public and the CBJ Assembly on sustainability-related issues.*

The JCOS is charged with additional duties from the Assembly when it adopted *Juneau's Climate Action and Implementation Plan* (CBJ Resolution 2593; November 14, 2011).

Membership

The 11-member Commission includes nine public members appointed by the Assembly, and one non-voting member each of the Assembly and the Planning Commission. The Commission is supported by CBJ/CDD staff liaisons. The Commission's membership reflects environmental, social, economic, and governmental perspectives unified by the common interests of sustainability.

The JCOS members currently serving are:

Meetings and JCOS Committees

The Commission holds its regular meeting on the 1st Wednesday of each month and work sessions on the 3rd Wednesday. During this report's time period, the Commission held 12 regular commission meetings, two special meetings, numerous work sessions, and the January 2021 annual retreat.

For additional background about the Commission, see Attachment 1.

IV. ACCOMPLISHMENTS FOR 2020-21

A. Implementation of the Juneau Renewable Energy Strategy

JCOS continued to advocate for implementation of the *Juneau Renewable Energy Strategy* (2018), and the *Juneau Climate Action & Implementation Plan* (2011) – both adopted by the CBJ Assembly. Over the past year, JCOS focused efforts on the Assembly's goals to "make long term plan to achieve reliance on 80% renewable energy sources by 2045" and "develop a strategy to measure, track, and reduce CBJ energy consumption".

The JCOS Energy Committee is tasked with providing recommendations, and assistance when requested, to CBJ Assembly and staff on implementation of the four strategic areas of

JRES:

1. Implement a CBJ energy management program
2. Reduce Juneau's dependence on fossil fuels for space heating
3. Reduce Juneau's dependence on fossil fuels for transportation
4. Support efforts to provide new renewable energy supplies

The Energy Committee appreciates the Assembly's goal setting and the active engagement of the Assembly PWFC and E&PW Dept. on these issues in the past year. JCOS acknowledges the CBJ funding directed toward: partial (energy) staffing in E&PW Dept, research & planning for EV charging infrastructure, Alaska Heat Smart (heat pump conversions), and energy upgrades of CBJ facilities. JCOS actively participates in the annual CIP process and notes that progress may have been made in integrating sustainability into the City's CIP process.

1. CBJ Energy Management

The goal of this initiative is for CBJ to develop a comprehensive energy management program that allows for systematic consideration of energy use and costs in decision-making at all levels to identify potential energy savings. Internal actions by CBJ can also provide "success stories" as models for the public and private sectors.

The Assembly's aforementioned 2021 goal addressing CBJ energy consumption is a positive step, and the E&PW Dept. is taking concrete actions. Unfortunately, the collection of energy data – of both CBJ's usage and of the community in general - is a difficult task because of the way the information is reported to the city.

In the past six months, JCOS has received E&PW Dept. verbal reports and written energy analyses of several CBJ facilities being examined for energy efficiency upgrades, including the October 2020 bond-funded energy projects. Similarly, CBJ facilities maintenance staff are now tracking energy use subsequent to equipment replacements, renovations, etc.

2. Space Heating and Buildings

Over the past year, JCOS liaisons continued to participate in the roll-out of the Alaska Heat Smart program that assists homeowners to convert to heat pump space heating. Through March 2021, the project has assisted over 450 Juneau homeowners, and Juneau-specific heat pump calculations indicate an average savings of 40% in annual heating costs. The typical Juneau household heating system conversion will avoid \$10,000 lbs. of CO₂ each year – the amount emitted annually by the average U.S. car.

Through the collaborative, US Dept of Energy-funded *Thermalize Juneau* project among Alaska Heat Smart, Cold Climate Housing Research Center at UAF, and Alaska Energy Light & Power (US Dept of Energy funding, JCOS has gained valuable information about what it takes to scale up space heating conversions in Juneau. JCOS continues to work with the full range of groups involved in energy efficiency and heating, including a coordinated effort on electrification of heating loads.

3. Transportation: Electric Vehicles

The JCOS has advocated for electric vehicles (EV) and charging infrastructure for seven years, helping to provide information and promote electric vehicle adoption in the community. Unlike many communities that rely either on private industry or government to provide public EV charging infrastructure, Juneau has benefitted from collaborative private-public partnerships.

Juneau continues as a leading EV adopting community and is one of the fastest growing EV communities in America. In the past 7 years, the number of electric vehicles has grown to over 500, with 1 to 2 new electric vehicles arriving in Juneau weekly. According to a 2019 report by Experian Information Solutions, which examined all EV sales, Juneau ranked 3rd in the Nation.

In the past year, JCOS shared its earlier EV plan outline (2018) and background knowledge with the E&PW Dept staff undertaking research on EV charging infrastructure.

JCOS continues to support efforts to acquire electric buses, both by the city and private companies. In March 2021, JCOS assisted Capital Transit staff developing a 2021 federal Lo-No grant by gathering numerous letters of support from a variety of Juneau organizations. In response to the 2021 grant process focus on air quality, JCOS reached out to ADEC and obtained a letter of support for the CBJ application.

4. New Renewable Energy Supplies

JCOS helps share information about the status of renewable energy supplies and projects in Juneau. As proposals to meet the other JRES goals through electrification of heating and transportation are developed, there is a need for better information about electricity supply, demand and costs, which is provided by the industry. JCOS sees its role as helping to make this information available to the public.

B. Solid Waste

In its second year, the JCOS Solid Waste Committee produced an informative report describing the status and ongoing issues about solid waste in Juneau. The ***Juneau Solid Waste Fact Sheet and Recommendations for a Course of Actions by the CBJ Assembly*** (March 2021) provides background information and recommends specific actions going forward to begin to address the eventual closure of the existing landfill when it reaches capacity in about 20 years.

Committee members have actively participated in Assembly PWFC meetings as that committee and the E&PW Dept begin to research steps that CBJ could take to reduce waste and divert reusable materials from the landfill as a way to buy the community time before a new landfill is needed. JCOS also held a virtual sustainability session on *Solid Waste in Juneau 101* in late May with approx. 18 attendees. The Solid Waste Committee anticipates that

other sustainability sessions on aspects of solid waste will be forthcoming.

C. Outreach

1. *Sustainability Sessions*

The sustainability sessions are intended to raise public awareness, discourse and education about sustainability topics relevant to Juneau. The Outreach Committee initiated a new format for short, lunchtime sustainability sessions in March – May. A speaker presents information for 30 minutes, followed by a 30-minute Q&A period. The three topics addressed: **air quality monitoring in Juneau (March), Juneau Renewable Energy Strategy refresher (April), and Juneau’s Solid Waste 101 (May)**. Additional sessions are in the works for 2021.

2. *JCOS Media Presence*

JCOS maintains a website under the Community Development Department and also has a Facebook page. The above-mentioned JCOS sustainability sessions are recorded and posted, as are JCOS reports and meeting minutes. As JCOS members identify worthwhile articles or reports on sustainability topics germane to Juneau, these are also posted for the public.

D. Sustainability Indicators and Impacts

1. *Sustainability Awards*

Drawing on models in other municipalities, the Sustainability Committee developed a Sustainability Awards concept, whereby a community individual, organization, business, or agency would be recognized for their efforts that achieve sustainability addressing a resilient economy, climate change and adaptation, energy efficiency in the built environment, public policy, natural ecosystems, transportation, solid waste reduction/diversion, food security, or public/community health. The JCOS would solicit and review applications and make a recommendation to the Assembly, which would select the annual award recipient. The proposal was approved by the Assembly HRC and is pending for consideration by the full Assembly.

2. *Juneau’s Changing Environment – Impacts and Solutions*

The JCOS Sustainability Committee, in collaboration with the UAS and UAF scientists, is updating the original 2007 *Predictions of Climate Change Impacts* based on the latest information and understanding of climate change and its impacts. JCOS members anticipate reviewing a draft report, following a peer review, with completion in 2021.

I look forward to continued engagement on JCOS. I am a historian of Alaska and museum professional. I work to build the capacity of cultural organizations across Alaska and collaborate on multi-disciplinary projects that elevate Alaska voices. As an Alaska Salmon Fellow, I worked with artists, writers, and others across Alaska to create a traveling exhibit used to inspire critical conversations about equity and sustainability within Alaska's salmon system. I'm now working to enhance the adaptive leadership skills of Alaska's museum community so that cultural organizations are resilient in the face of economic and environmental uncertainty. I am also a Sustainability Fellow through the National Informal STEM Education Network. I am eager to apply my experience working in informal education, non-profit governance, and working with statewide constituencies in service of the community where I live.

My father was a builder and I loved working on projects with him. Seeing a project come to life--from the early plans through completion gave me a lot of satisfaction. Two years ago we moved from a very rapidly growing city and often wondering how the city was going to sustain (continue to support) such grow. I wasn't on a board there, but I would read to stay up on zoning changes and other pieces that might affect our area. My family and I have very much enjoyed Juneau thus far and I would love to help shape its future, especially around sustainability. One of Juneau's unique opportunities is around sustainable tourism--something I'm very interested in. Juneau is also a perfect city for more electric vehicles, the battery range is never an issue :). I was also excited to hear Juneau received the first electric bus! I love finding new ways to solve old problems. I have a Masters in Public Administrator, but haven't worked in the public sector (went straight into healthcare out of college), so I'd like to get involved in some way in the community to get back closer to where I started--and to give back to the community in a meaningful way. Thank you.

I love Juneau. I grew up here and want to see it flourish. I believe Juneau is able to set a global standard for small community sustainability. Tell the world we are not merely the capital city of a state focused on petroleum / mineral extraction and tourism. We are a community providing an example for the future. I love the renewable energy focus around town and diverting our dependence on fossil fuel for transportation is a must. Hand-in-hand with that effort, I would love to put significantly more focus on the control and reduction of physical waste. Waste is a non-partisan issue. It's extremely visible, foul-smelling (especially around Lemon Creek), and has a huge negative environmental impact on our community, the state, and the world. From a consumption perspective, I shop with intent for bulk items and limit my purchase of single use plastics to nearly zero. Living with me is challenging in that regard. Each choice for food and consumer products is an exercise in consideration of the product, the recycled content, the packaging, the shipping, and the sustainability mission of the company producing and selling the item. However, I am passionate about the negative impact of micro-plastics and their invasion of the aquatic biomes around the globe.

I have never served on a board myself other than the begining stages of the Zero Waste Juneau board before Covid. I am currently self-employed, starting up a textile recycling project in Juneau.

I have a certificate in Outdoor Studies at the University of Alaska Southeast. I have extended family who owns and operates a refuse recycling facility in Central California; there, I learned about the inefficiencies with recyclables and our waste streams as a whole. I have formal schooling from the Art Institute of Seattle for Graphic Design and UCLA for Web Design, so I am good with computers and all the digital imagery / document files that come with them. I have professional experience in graphic design and commercial video production.

I am interested in being reappointed to JCOS. Juneau is my hometown and I care about the well being of the town and it's youth. The safety and accessibility of the town and all it has to offer are high priorities of mine. Children should be able to safely enjoy recreational activities such as hiking, biking, swimming, skiing, etc. in Juneau. Children who do not have easy access to recreational activities in Juneau are equally as deserving as everyone else who resides here, and it is the community's job to support that. I want to support local youth and empower them to make insightful, healthy decisions to better themselves and their community. I would be honored to serve the children of Juneau and make this a place they are proud to call home.

Please explain, with specificity, your reasons for applying to serve on this particular board.

I would like to serve on the Juneau Commission on Sustainability because I want to make positive changes in my community. As a lifelong Alaskan, I have watched first hand as the weather has changed and our wildlife and resources have diminished. I moved back to Juneau this summer after spending time abroad and after living and teaching in Kodiak because I wanted to raise my daughter in the place I call home. I want her to have the chance to see Alaska the way I saw it growing up and I worry things are changing too fast. I often fear that we will not be able to make the changes we need to until it's too late. Being on the commission will allow me to play an active role in creating change. In my free time, I research ways to be more sustainable by reading books, listening to podcasts, and watching documentaries. I also promote sustainability to friends and family through conversations and social media.
